Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 October 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 3-18 is/are pending in the application.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 3 - 18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Claims 1, 3 - 4, 8 - 10, 14 - 16 referred to the phase "real information" and "content information", but applicant didn't provide enough information in the specification to explain this phase in the specification. In the interest of compact prosecution, it is assumed this is data in an annotation.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Balogh et al (U.S. 5,493,677).

♦ As per claim 1,

- "Multimedia data" corresponds to image and annotations as shown in Fig 6 element 602, 610, and 604. Because the type of image may include a multimedia

Art Unit: 2171

object (Col. 3 line 30 – 34), therefore, multimedia object will contain multimedia data.

- "Receiving multimedia information and multiple supplementary information" See Fig. 3 element 250 and 262, column 3 line 10 – 43, column 8 line 64 – column 9 line 15.
- "Content information" corresponds to the "Picture #, Photographer or Agency"
- "Real information" corresponds to the "bibliographic information", because this identifies the object name or contains "information in the real place which is meaningful place in view of the content" (Col. 3 line 18 – 22).
- "Separating the multimedia information and the multiple supplementary information" See Fig. 6 column 5 line 48 – column 6 line 5.
- "Displaying the multimedia information" See Fig. 6 element 602, column 5 line 51 – 55.
- "Browsing/searching supplementary information" fig. 1 element 126, column 4 line 15 – 47, column 3 line 5.
- "Displaying the supplementary information when a user requests for browsing/searching the supplementary information" See Fig. 14, column 17 line 14 – 22.
- "Multiple supplementary information including real information" is referred as "metadata". See Fig. 3 element 262, column 3 line 40 - 43.

♦ As per claim 8,

Art Unit: 2171

The elements of claim 8 are rejected in the analysis above, and this claim is rejected on that basis.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3 - 7, 9 - 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Balogh et al (U.S. 5,493,677) in view of Lagarde et al (U.S. 5,710,918).

♦ As per claim 3 – 4, 9 – 10, 15 – 16, 18,

- “Text information describing character of the object” See Fig. 14 element 1406, column 3 line 10 – 43, column 17 line 14 – 22 of Balogh.

Balogh fail to disclose the relationship of object information in a graph. However, Lagarde et al (U.S. 5,710,918), discloses in the invention a graph that show the relationship between different objects in the environments (See Fig. 9 of Lagarde), and the objects can be different type such as image, voice, multimedia presentation (see column 10 line 60 – 65 of Lagarde). It was well known in the art at the time of the invention was made to display graphs of related objects and processes, as taught by Lagarde (See Fig. 9). In Lagarde, Query database (91a) is a place, “calculate data” (93) is an event, and both the “multi-joint” (92) and “data format” (94) are objects. It would have been obvious to one with ordinary skill in the art at the

Art Unit: 2171

time the invention was made to apply this technique to any combination of object, event, and place because this illustrates the relationships between them.

♦ As per claim 5 - 7, 11 – 13,

- “Text information having information describing the object” See fig. 3 element 262 of Balogh.
- “Image information” See fig. 3 element 250 of Balogh.
- “Information on location” See column 3 line 19 – 20 of Balogh.

♦ As per claims 14, 17,

The limitations in claims 14 and 17 are rejected in the analysis above, and those claims are rejected on that basis.

Response to Arguments

3. Applicant’s arguments filed 10/08/2002 have been fully considered but they are not persuasive.

Applicant argues that Balogh reference fails to disclose “multimedia information and multiple supplementary information of each object”. However, referring to Fig. 2, Balogh discloses an image and associated information to be input to the system. The association data is referred as “metadata” (Col. 3 line 2 – 6). This metadata includes multiple supplementary information of each object (Col. 3 line 40 – 43). According to col. 3 line 30 – 34, where the type of object can be a multimedia object, therefore, the information is considered as multimedia data.

Conclusion

Art Unit: 2171

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
